

Forum Hydrogen Business For Climate

Hydrogen Business For Climate Forum – 5th edition
Thursday 4 December 2025 – Atria, Belfort

“Safe & Scale – Secure and Accelerate”

The laws of physics remain unchanged. Hydrogen technologies continue to advance.
France is ready to scale up...

But in 2025, EVERYTHING is changing :

- An emergency for the climate, with surprising denial and a return to favour for fossil fuels
- An emergency for the economy, with a hydrogen sector that is ready to roar but that lacks support in France
- An emergency in terms of strategies, with trade being radically reshaped against a backdrop of economic, military and information warfare

The 5th annual Hydrogen Business For Climate Forum is evolving in response to this new landscape, offering reflection on 3 major objectives to launch hydrogen markets, generating energy that is:

- Safe
- Available
- An essential part of the energy mix.

The Forum continues to act as a strategic compass, increasingly essential to help you find your way in today's complex world! The business aspect will be bolstered to help the sector develop.

The day's programme includes:

- **3 round tables** covering the 3 objectives
 - Round table 1 – Is hydrogen risk management under control?
 - Round table 2 – Producing more, better carbon: at the heart of the issues of self-sufficiency and decarbonisation
 - Round table 3 – Which markets should be prioritized at this stage?
- **1 exhibition area** for explanations and demonstrations
- **Networking opportunities** throughout the day
- **B2B meetings** to make business opportunities a reality

This year, make the most of your participation with the Marketplace for:

- **Highlight business opportunities:** where supply meets demand
- **Post job offers and applications,** to unleash your projects' full potential, without constraint.

Bringing together almost 400 decision-makers from the private and public sectors, politicians, experts, academics and investors, this 5th edition is a day to **learn, exhibit, discuss, initiate and progress.**

Become an exhibitor!
