

# Forum Hydrogen Business For Climate

6<sup>th</sup> edition - Tuesday 8 December 2026 - Axone, Montbéliard

## H2 SECTOR UNDER PRESSURE? THEN LET'S PREPARE OUR NEXT STEPS!

**There may be a slowdown in France, but it's not happening all over Europe, and even less so in various other regions of the world.**

Hydrogen hasn't been abandoned. In fact it's been made a national priority in China's new five-year plan. And in a number of countries, projects are moving through the final investment decision. But if hydrogen isn't reasonably priced, there can be no market. The good news is that we are beginning to see the emergence of sites that will be producing renewable hydrogen on a large scale. Including in France. So the industry must not give up. But we need to focus our efforts on the most practical applications.

This 6<sup>th</sup> edition proposes to reflect on **3 major levers for accelerating the growth of hydrogen markets:**

- Address global markets
- Develop European cooperation
- Adopt hydrogen for mobility

The Forum continues to act as a strategic compass, as vital as ever to help you find your way in today's complex world! The business aspect will be bolstered to help the sector continue to develop.

The day's programme includes:

- **Opening plenary**
- **Analysis and fact-checking session**
- **3 round tables covering the 3 objectives**
  - **Round Table 1** - Asia: competition or opportunity?
  - **Round table 2** - European cooperation: the key to success?
  - **Round table 3** - Hydrogen Mobility: examples of practical applications and real world deployment
- An **Exhibition Area** for explanations and demonstrations
- **Networking opportunities** throughout the day
- **B2B meetings** making business opportunities a reality

## Increase your visibility with Marketplace, and:

- **Promote business opportunities:** where offer meets demand
- **Advertise job offers and available talents** to unleash your projects' full potential without constraint.

Bringing together almost 350 decision-makers from the private and public sectors, politicians, experts, academics and investors, this 6<sup>th</sup> edition is a day-long opportunity to

- **Learn**
- **Exhibit**
- **Discuss**
- **Initiate**
- **Progress**
